{{ item.title }}

{{ item.description }}

Approved: {{ item.approved }}

{% endfor %}

- Child account management
- Content upload
- Approval workflow
- Learning library
- Activity tracking

Demo Roadmap

Upload Content

{% csrf_token %} Title

Description

Video URL

Upload

1. Show GitHub repository
2. Show adult dashboard
3. Show content upload
4. Show child library access

System Plan

System Components

- **User Interface**
  - Web-based dashboard for administrators
  - Child-friendly learning library interface
- **Application Server**
  - Backend logic built with Django (web framework)
  - Handles content submission, review, and retrieval
- **Database System**
  - SQLite database for storing educational content and user information
  - Supports fast retrieval and secure data storage

System Workflow

- Administrator logs into the CMS dashboard
- Administrator uploads educational content
- System stores content in the database
- Content becomes available in the child learning library
- Children access safe, approved educational materials

Child Learning Library

{% for item in content %}

{{ item.title }}

View Content
{% endfor %}

Deployment

1. Local server for demonstration using Django development server
2. Future deployment could include cloud hosting for scalability

Thank you
