

User Interface Design and Implementation

Design Principles

Bright, simple layout for children

Clear navigation for adults

No ads or external distractions

Key Interfaces

Adult Dashboard

Manage child profiles

Upload and approve content

Content Upload Form

File upload field

Title and description input

Child Learning Library

Displays only approved content

Simple grid layout

Large buttons and visuals

Implementation

Built using Django templates

Example file: `child_library.html`

Uses dynamic rendering:

Displays content based on approval status

Restricts access via backend validation
